

Role of Instance variable in Object creation :

```
public class Test
{
    int x = 10;

    public static void main(String[] args)
    {
        Test t1 = new Test();
        Test t2 = new Test();
        ++t1.x;    --t2.x;

        System.out.println(t1.x);
        System.out.println(t2.x);
    }
}
```
